the maritime floor

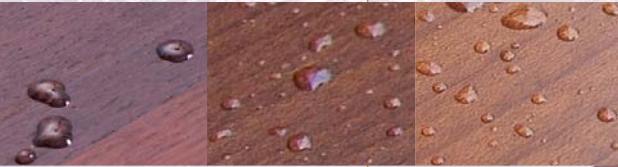

the solid wood floor for bathrooms, living and wellness rooms

marin

Austrian craftsmanship:  
smooth, water resistant, beautiful. Fabulous underfoot.

# marin

Waterproof flooring  
for bathrooms,  
wellness- and  
living areas.

A modern floor fulfils its function if it is both practical and creates an atmosphere of wellbeing. MARIN solid wood floors meet both of these requirements. Their warm hues and clear designs give bathrooms, wellness and living areas a special quality. The resilient timber and waterproof joints make MARIN floors particularly durable and water-resistant.

#### The wood – tamed and made even more beautiful by heat

The floor is made of heat-purified MARIN-thermowood – indigenous hardwood heated to over 200° C. The wood sugar, or xylose, caramelises, giving the boards an exotic warm look without chemicals or coatings. The material is then practically unable to absorb any more water and becomes dimensionally stable and durable. The timber comes from sustainably managed Austrian forests.

#### The surface – Hygienic and warm to walk on

The floorboards are sealed with natural oil so that they can breathe and are easy to clean. The velvety surface feels warm to the touch and is therefore ideal for areas where people like to go barefoot.

The MARIN jointing compound is robust and resistant to light acids and bases. The flexible connection supports the floor's natural breathing and makes it non-permeable and resilient. The floor is delivered ready to lay and requires no additional sanding or sealing when installed.

- ◆ Water resistant
- ◆ Suitable for underfloor heating
- ◆ Ready to lay
- ◆ Hygienic surface, warm to walk on
- ◆ For bathrooms, living and wellness areas
- ◆ Indigenous timber with exotic flair

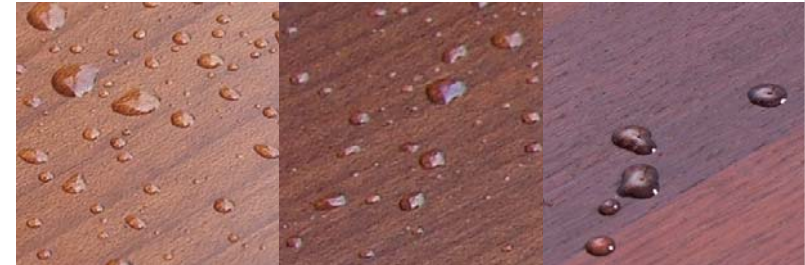

WE DON'T WANT TO CHANGE NATURE, JUST HARNESS ITS GENIUS.

board-sizes:  
13 / 113 / 978 mm [t/w/l]

Available:

- ◆ maple forte
- ◆ birch forte
- ◆ ash forte

Please follow the instructions for laying and maintenance.
